Skills

Technology

Python, R, Keras, Tensorflow,
PyTorch, MERN-Stack

Machine Learning / Deep Learning

Reinforcement Learning

Natural Language Processing

CRISP-DM

Explainable AI

Business

Analytical Problem Solving

Teamwork

Business Development & Business
Plans

Agile Software Development

Pitching & Presentations

Languages

German: Native

English, Spanish & Portuguese: Fluent

Others

Social Entrepreneurship Project at
Enactus München e.V.

Business Model Development
(UnternehmerTUM GmbH)

Sailor, Drone Pilot & Videographer

EDUCATION

Since 04/2021

M. Sc. Computer Science at Technical University of Munich

- Specialization: Machine Learning, NLP & Software Engineering

10/2017 – 05/2021

B.Sc. Computer Science Technical University of Munich

- Final Grade: 1.8
- Specialization: Mathematics, Statistics, Artificial Intelligence

10/2015 – 02/2019

B. Sc. Management & Technology at Technical University of Munich

- Final Grade: 1.5 | Dean's List
- Specialization: Computer Science, Operations Management

01/2013 – 08/2015

Käthe-Kollwitz-Schule (High School), Bruchsal

- Final Grade: 1.1 | **Exchange Year in Brazil** | Specialization: Psychology

EXPERIENCE

Since 2019

Founder at SKIO, Munich (<http://skio.ai>)

- Founder of SKIO: A HR-Tech start up (skio.ai).
- Building a Web-App that uses NLP to connect experts within organizations

10/2020 – 01/2021

Internship at Credit Suisse, Zurich, Switzerland

- Cognitive Platform: Building an AI-based Chatbot with Rasa.
- Building a question answering system with haystack to retrieve answers from a set of documents

04/2017 – 06/2017

Internship at AT Kearney, Munich

- Mathematical Optimization for the selection of suppliers

09/2016 – 11/2016

Internship at msg Gillardon, Ismaning,

- PoC development for twitter sentiment analysis to monitor customer satisfaction

PROJECTS

Explainable AI: Making Neural Networks explainable for NLP-tasks

StackOverflow Tagging: Multi-Input LSTM to automatically tag text.

ProjectHR21: Web-Application that uses NLP to connect experts.

Predictive Maintenance: Thesis - Applying Machine Learning in a production line.

Peeroulette: Web-Application to connect like-minded people via video chats

Intelligent Inventory Management: Thesis - Applying Reinforcement Learning to optimize cost in a serial supply chain.
